

Blinkit Retail Sales Performance Dashboard

Sales Trends & Key Insights for Retail Outlets

BY- KHUSHI PAINTER

Objective

The objective of this dashboard is to analyze Blinkit's sales performance across different product categories and outlet types. It highlights sales trends, identifies high-performing outlets, and provides insights that can support effective decision-making and retail growth strategies.

Additionally, the dashboard helps in comparing sales across locations and outlet sizes, making it easier to spot regional strengths and weaknesses. It also tracks customer satisfaction with an average rating of 4, ensuring service quality remains consistent. By combining sales data with outlet performance, this analysis offers a complete picture of Blinkit's retail operations.

Dataset Overview

The dataset consists of retail sales data from multiple outlets across India.
It includes:

- **Item details** – type, fat content, visibility, price.
- **Outlet details** – location, type, and establishment year.
- **Performance metrics** – sales, number of items, and customer ratings.

Overall, the dataset covers **8,523 items across various outlet formats and regions.**

Total Sales View

- **Total Sales:** \$1.20M
- **By Fat Content:** Regular – \$776.32K, Low Fat – \$425.36K
- **By Item Type:** Fruits & Vegetables (\$0.18M) and Snack Foods (\$0.18M) are top contributors.
- **By Outlet Type:** Supermarket Type1 leads with \$787.55K sales.
- **By Location:** Tier 3 generates the highest sales (\$472.13K).
- **Trend:** Sales peaked in 2018 at \$0.20M before stabilizing around \$0.13M.

Insight: Sales are dominated by Regular fat items and Supermarket Type1, making them the key contributors to revenue.

Average Sales View

- **Average Sales Value:** \$141
- **By Fat Content:** Regular – \$142, Low Fat – \$141
- **By Item Type:** Household (\$149), Dairy (\$148), and Starchy Foods (\$148) top the list.
- **By Outlet Type:** All types average around \$140–\$142 per item.
- **Outlet Size:** Small outlets (\$142) perform slightly better than Medium/High (\$140–\$141).
- **By Location:** Tier 1, Tier 2, and Tier 3 all average **\$141**, showing consistency.

Insight: Although average sales remain consistent across outlets, **Household and Dairy products drive the highest per-item value.**

Number of Items View

- **Total Items:** 8,523
- **By Fat Content:** Regular – 6K, Low Fat – 3K
- **By Item Type:** Fruits & Vegetables (1,232) and Snack Foods (1,200) have the highest counts.
- **By Outlet Type:** Supermarket Type1 stocks the most with 5,577 items.
- **By Location:** Tier 2 and Tier 3 have 3K items each, Tier 1 has 2K.

Insight: Regular fat items and fresh items like fruits and vegetables, along with snacks, dominate inventory across outlets.

Average Rating View

- **Overall Average Rating:** 4 (out of 5)
- **By Fat Content:** Regular – 4, Low Fat – 4
- **By Item Type:** All item categories hold a rating of 4.
- **By Outlet Type:** Supermarket Type1, Type2, Type3, and Grocery Store all show 4.
- **By Location:** Tier 1, Tier 2, and Tier 3 outlets maintain a stable rating of 4.

Insight: Customer satisfaction is **consistently high**, indicating strong acceptance of Blinkit's offerings.

Conclusion

The analysis of Blinkit's retail sales performance reveals valuable insights about customer preferences and outlet performance.

- **Total sales of \$1.20M** are largely driven by regular fat items and Tier 3 outlets, while **average sales remain steady at \$141** across categories.
- Fresh items like fruits, vegetables, and snacks account for a big share of sales, highlighting customer demand for daily essentials.
- **Supermarket Type 1** contributes the highest revenue of **\$787.55K**, supported by a wide product range and high item visibility.
- The overall average customer rating of **4** shows steady satisfaction across outlets.

These findings highlight the importance of product variety, outlet expansion, and service quality. Focusing on Tier 3 regions, strengthening supply chains, and offering promotions in high-demand categories can drive long-term growth.
